Topic Proposal Reflection

During Task 1, my writing process felt organized. Since I was given a list of questions to guide me, I was able to focus on each question individually. My future writing projects may not have guiding questions like this, so I could create questions to plan out my writing. My writing for Task 1 was clear and concise, and I felt that I kept it interesting. Aside from my successes, I still have areas of improvement. Even though I mentioned some specific team strategies, I would like to go into more detail in the future. This would make my writing even more interesting and useful. There were some parts of this task that were easy, and some were difficult. It was easy to know what content to write about because questions were listed in the assignment. I had some trouble writing about content specific to my research because I have not explored any research yet. I was able to write about my personal experiences with struggling in a team, but I haven't yet learned much about team strategies. In future writing, I would like to dive deeper into content specific to the research topic. This is one of the most important parts of the writing.

Learning Outcomes Reflection

1. Generating Inquiry	No ▾	I wrote using the writing knowledge that I already possessed, and I did not need to use inquiry to learn more writing skills.
2. Multiple ways of writing	No ▾	My Task 1 was only plain writing, so it was not multimodal.
3. Information Literacy	Yes ▾	I used sources to learn briefly about two team strategies. I knew that these sources were trustworthy because their topics were very general, and I checked more than one source for each topic.
4. Research Genre Production	Yes ▾	The expected audience for this task is scholars who could potentially have no knowledge of my topic. I wrote with this audience in mind.
5. Contributing Knowledge	No ▾	I did not need to analyze a lot of evidence for this task, so I did not achieve this goal.
6. Revision	No ▾	I did not get any feedback from others when writing this task.
