The Revision Plan

1. Add All Rubric Items:

The most obvious and important revision is to follow the rubric. I need to hit the requirement of 3 used sources, and I need to include more required sections, particularly in my research plan.

2. Account for Confusion:

In my peer feedback, I noticed some confusion was mentioned surrounding my research plan. I do not want my audience to be confused, so I plan to add much more to my research plan. I would like to add some type of diagram to visualize the potential research plan. This would be interesting to the reader, rather than reading plain text.

3. Develop Interest:

One of my peers suggested adding a good hook. I would like to follow this suggestion by telling a story about my experience with team work in my group. I have a relatable story of being in a team and having to deal with partners slacking off.
